Complaint issued on 1/24/1984 with a proposed penalty of \$3,000.
Case settled and closed 7/18/1985 for \$50.

No other enf actions issued.

I'm attaching documents that I've received from TCEQ.

Lou

Jim:

I generally understand the history but what I was wondering is what happened back in the 1990's from a TSCA Enforcement standpoint. We did removal assessments in 1991 and 1995 and it says it was referred back to TSCA due to the fact that it was an operating facility. Did EPA ever take an enforcement action during that timeframe?

Thanks
Gary Moore

Lou and I have worked on this—It was not put on the NPL, and since the Doyle's have no money to clean it up, EPA has not pursued enforcement action. The TCEQ is involved with the site, and they have been trying to get some action on it through their enforcement program—to no avail I believe so far.

Jim:

Can you look at the records for this site and let me know what actions were taken by the TSCA Enforcement Group over the years to have this company address the PCB spills?

Lou, I have added you since you may have some history.

Thanks
